Experience

Software Engineer II, WellHive Remote

May 18, 2026 – Present

Software Engineer II, Green XT Remote

August 16, 2024 – May 15, 2026

- Integral member of the MGTIS (Marine Gas Turbine Information System) team, driving the development of the Weblog application.
- Spearheaded the transition from multiple legacy applications to the Weblog ASP.NET Core web application, culminating in its successful deployment on March 1, 2024, serving thousands of Navy personnel.
- Proficiently utilized C#, JavaScript, Entity Framework Core, and Telerik UI to architect and maintain the Weblog system.
- Operated in a full-stack capacity, employing Agile methodologies and Jira for efficient task management and prioritization.

Software Engineer, Green XT Remote

August 16, 2021 – August 16, 2024
